IL1 beta Rabbit mAb

Catalog No: #49248

Package Size: #49248-1 50ul #49248-2 100ul

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

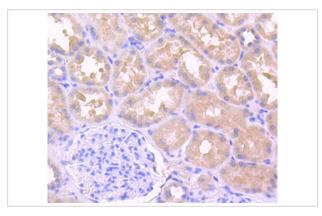

| Description | |
|-----------------------|---|
| Product Name | IL1 beta Rabbit mAb |
| Host Species | Recombinant Rabbit |
| Clonality | Monoclonal antibody |
| Clone No. | JJ087-3 |
| Purification | ProA affinity purified |
| Applications | WB, ICC/IF, IHC, FC |
| Species Reactivity | Hu |
| Immunogen Description | recombinant protein |
| Other Names | Catabolin antibody H1 antibody IL 1 antibody IL 1 beta antibody IL-1 beta antibody IL1 BETA antibody IL1B |
| | antibody IL1B_HUMAN antibody IL1F2 antibody Interleukin 1 beta antibody Interleukin-1 beta antibody OAF |
| | antibody OTTHUMP00000162031 antibody Preinterleukin 1 beta antibody Pro interleukin 1 beta antibody |
| Accession No. | Swiss-Prot#:P01584 |
| Uniprot | P01584 |
| GenelD | 3553; |
| Calculated MW | 31 kDa |
| Formulation | 1*TBS (pH7.4), 1%BSA, 40%Glycerol. Preservative: 0.05% Sodium Azide. |
| Storage | Store at -20°C |
| | |

Application Details

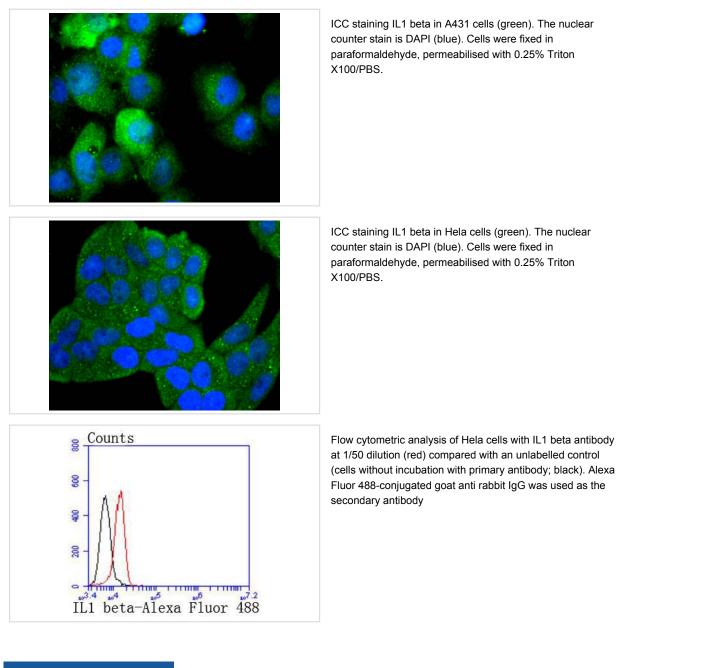

WB: 1:1,000IHC: 1:50-1:200

ICC: 1:50-1:200FC: 1:50-1:100

Images

Immunohistochemical analysis of paraffin-embedded human kidney tissue using anti-IL1 beta antibody. Counter stained with hematoxylin.

Background

Two forms of interleukin-1, designated IL-1 α and IL-1 β , have been described. Although encoded by distinct genes and exhibiting roughly only 25% sequence identity, IL-1 α and IL-1 β bind to the same receptor and seem to elicit similar biological responses. IL-1 production is generally thought to be associated with inflammation, but it has also been shown to be expressed during kidney development, thymocyte differentiation and cartilage degradation. IL-1 plays a critical role in the regulation of immune response and inflammation, acting as an activator of T and B lymphocytes and natural killer (NK) cells. In T cells, IL-1 stimulates the production of IL-2 and selectively inhibits IL-4 expression. IL-1 induces B cell proliferation and maturation, and immunoglobulin synthesis. NK cells require IL-1 β for production of the anti- pathogen IFN- γ . IL-1 has also been implicated in several pathological conditions including rheumatoid arthritis, inflammatory bowel disease and atherosclerosis.
