## Mouse Synaptotagmin-13 (SYT13) ELISA Kit

Catalog No: #EK6777

Package Size: #EK6777-1 48T #EK6777-2 96T

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

## Description

Product NameMouse Synaptotagmin-13 (SYT13) ELISA KitBrief DescriptionELISA KitApplicationsELISASpecies ReactivityMouse (Mus musculus)	
Applications ELISA   Species Reactivity Mouse (Mus musculus)	
Species Reactivity Mouse (Mus musculus)	
Other Names KIAA1427;	
Accession No. Q9EQT6	
Uniprot Q9EQT6	
GenelD 80976;	
Storage The stability of ELISA kit is determined by the loss rate of activity. The loss rate of the stability of ELISA kit is determined by the loss rate of the stability of th	his kit is less than 5%
within the expiration date under appropriate storage condition.	
The loss rate was determined by accelerated thermal degradation test. Keep the kit	at 37C for 4 and 7 days,
and compare O.D.values of the kit kept at 37C with that of at recommended temper	ature. (referring from China
Biological Products Standard, which was calculated by the Arrhenius equation. For	ELISA kit, 4 days storage
at 37C can be considered as 6 months at 2 - 8C, which means 7 days at 37C equal	ling 12 months at 2 - 8C).

Application Details	
Detect Range:Request Informat	ion
Sensitivity:Request Information	
Sample Type:Serum, Plasma, C	Other biological fluids
Sample Volume: 1-200 µL	
Assay Time:1-4.5h	
Detection wavelength:450 nm	

## Product Description

Detection Method:SandwichTest principle:This assay employs a two-site sandwich ELISA to quantitate SYT13 in samples. An antibody specific for SYT13 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and anySYT13 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for SYT13 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of SYT13 bound in the initial step. The color development is stopped and the intensity of the color is measured.

Note: This product is for in vitro research use only
