Rat Protein kinase C epsilon type (PRKCE) ELISA Kit

Catalog No: #EK8241

Package Size: #EK8241-1 48T #EK8241-2 96T

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Description

Brief DescriptionELISA KitApplicationsELISASpecies ReactivityRat (Rattus norvegicus)Other NamesMGC125656; MGC125657; PKCE; nPKC-epsilon;Accession No.P10830UniprotP10830GeneID10009103;		
ApplicationsELISASpecies ReactivityRat (Rattus norvegicus)Other NamesMGC125656; MGC125657; PKCE; nPKC-epsilon;Accession No.P10830UniprotP10830GeneID100009103;StorageThe stability of ELISA kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. The loss rate was determined by accelerated thermal degradation test. Keep the kit at 37C for 4 and 7 days, and compare O.D.values of the kit kept at 37C with that of at recommended temperature. (referring from China Biological Products Standard, which was calculated by the Arrhenius equation. For ELISA kit, 4 days storage	Product Name	Rat Protein kinase C epsilon type (PRKCE) ELISA Kit

and compare O.D.values of the kit kept at 37C with that of at recommended temperature. (referring from China Biological Products Standard, which was calculated by the Arrhenius equation. For ELISA kit, 4 days storage		within the expiration date under appropriate storage condition.
Biological Products Standard, which was calculated by the Arrhenius equation. For ELISA kit, 4 days storage		The loss rate was determined by accelerated thermal degradation test. Keep the kit at 37C for 4 and 7 days,
		and compare O.D.values of the kit kept at 37C with that of at recommended temperature. (referring from China
at 37C can be considered as 6 months at 2 - 8C, which means 7 days at 37C equaling 12 months at 2 - 8C).		Biological Products Standard, which was calculated by the Arrhenius equation. For ELISA kit, 4 days storage
		at 37C can be considered as 6 months at 2 - 8C, which means 7 days at 37C equaling 12 months at 2 - 8C).

Application Details	
Detect Range:1.56-100 ng/mL	
Sensitivity:0.58 ng/mL	
Sample Type:Serum, Plasma, G	Other biological fluids
Sample Volume: 1-200 µL	
Assay Time:1-4.5h	
Detection wavelength:450 nm	

Product Description

Detection Method:SandwichTest principle:This assay employs a two-site sandwich ELISA to quantitate PRKCE in samples. An antibody specific for PRKCE has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and anyPRKCE present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for PRKCE is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of PRKCE bound in the initial step. The color development is stopped and the intensity of the color is measured.Product Overview:PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members.

Protein kinase C epsilon type kinase has been shown to be involved in many different cellular functions, such as neuron channel activation, apoptosis, cardioprotection from ischemia, heat shock response, as well as insulin exocytosis. Knockout studies in mice suggest that this kinase is important for lipopolysaccharide (LPS)-mediated signaling in activated macrophages and may also play a role in controlling anxiety-like behavior.

Note: This product is for in vitro research use only
