

Recombinant Human FN1

Catalog No: #GP10004

Package Size: #GP10004-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human FN1
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 32-280 amino acids of human fibronectin 1
Target Name	fibronectin 1
Other Names	FN; CIG; FNZ; MSF; ED-B; FINC; GFND; LETS; GFND2
Accession No.	Swissprot:P02751Gene Accession:BC117176
Uniprot	P02751
GeneID	2335;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes fibronectin, a glycoprotein present in a soluble dimeric form in plasma, and in a dimeric or multimeric form at the cell surface and in extracellular matrix. Fibronectin is involved in cell adhesion and migration processes including embryogenesis, wound healing, blood coagulation, host defense, and metastasis. The gene has three regions subject to alternative splicing, with the potential to produce 20 different transcript variants. However, the full-length nature of some variants has not been determined.?
