

Recombinant Human MAGEA4

Catalog No: #GP10022

Package Size: #GP10022-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human MAGEA4
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	Melanoma-associated antigen 4
Other Names	CT1.4, MAGE-41, MAGE-X2, MAGE4, MAGE4A, MAGE4B, MGC21336
Accession No.	Swissprot:P43358Gene Accession:BC017723
Uniprot	P43358
GeneID	4103;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene is a member of the MAGEA gene family. The members of this family encode proteins with 50 to 80% sequence identity to each other. The promoters and first exons of the MAGEA genes show considerable variability, suggesting that the existence of this gene family enables the same function to be expressed under different transcriptional controls. The MAGEA genes are clustered at chromosomal location Xq28. They have been implicated in some hereditary disorders, such as dyskeratosis congenita. At least four variants encoding the same protein have been found for this gene.
