

Recombinant Human IL11RA

Catalog No: #GP10122

Package Size: #GP10122-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human IL11RA
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 185-371 amino acids of human Interleukin-11 receptor subunit alpha
Target Name	Interleukin-11 receptor subunit alpha
Other Names	CRSDA
Accession No.	Swissprot:Q14626Gene Accession:BC003110
Uniprot	Q14626
GenID	3590;
Storage	-20~-80°C, pH 7.6 PBS

Background

Interleukin 11 is a stromal cell-derived cytokine that belongs to a family of pleiotropic and redundant cytokines that use the gp130 transducing subunit in their high affinity receptors. This gene encodes the IL-11 receptor, which is a member of the hematopoietic cytokine receptor family. This particular receptor is very similar to ciliary neurotrophic factor, since both contain an extracellular region with a 2-domain structure composed of an immunoglobulin-like domain and a cytokine receptor-like domain. Multiple alternatively spliced transcript variants have been found for this gene.
