

Recombinant Human APPL1

Catalog No: #GP10205

Package Size: #GP10205-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human APPL1
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 250 amino acids of human adaptor protein, phosphotyrosine interaction, PH domain and leucine zipper containing 1
Target Name	Adaptor protein, phosphotyrosine interaction, PH domain and leucine zipper containing 1
Other Names	APPL; DIP13alpha
Accession No.	Swissprot:Q9UKG1Gene Accession:BC028599
Uniprot	Q9UKG1
GeneID	26060;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene has been shown to be involved in the regulation of cell proliferation, and in the crosstalk between the adiponectin signalling and insulin signalling pathways. The encoded protein binds many other proteins, including RAB5A, DCC, AKT2, PIK3CA, adiponectin receptors, and proteins of the NuRD/MeCP1 complex. This protein is found associated with endosomal membranes, but can be released by EGF and translocated to the nucleus.
