

Recombinant Human CCL13

Catalog No: #GP10265

Package Size: #GP10265-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CCL13
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 17-98 amino acids of human CCL13
Target Name	C-C motif chemokine ligand 13
Other Names	NCC1; CKb10; MCP-4; NCC-1; SCYL1; SCYA13
Accession No.	Swissprot:Q99616Gene Accession:BC008621
Uniprot	Q99616
GeneID	6357;
Storage	-20~-80°C, pH 7.6 PBS

Background

This antimicrobial gene is one of several Cys-Cys (CC) cytokine genes clustered on the q-arm of chromosome 17. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. The cytokine encoded by this gene displays chemotactic activity for monocytes, lymphocytes, basophils and eosinophils, but not neutrophils. This chemokine plays a role in accumulation of leukocytes during inflammation. It may also be involved in the recruitment of monocytes into the arterial wall during atherosclerosis.
