

Recombinant Human CCL28

Catalog No: #GP10271

Package Size: #GP10271-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CCL28
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 20-127 amino acids of human chemokine (C-C motif) ligand 28
Target Name	chemokine (C-C motif) ligand 28
Other Names	MEC, CCK1, SCYA28
Accession No.	Swissprot:Q9NRJ3Gene Accession:BC069532
Uniprot	Q9NRJ3
GenelD	56477;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene belongs to the subfamily of small cytokine CC genes. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. The cytokine encoded by this gene displays chemotactic activity for resting CD4 or CD8 T cells and eosinophils. The product of this gene binds to chemokine receptors CCR3 and CCR10. This chemokine may play a role in the physiology of extracutaneous epithelial tissues, including diverse mucosal organs.
