

Recombinant Human CEBPG

Catalog No: #GP10290

Package Size: #GP10290-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CEBPG
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	CCAAT/enhancer binding protein (C/EBP), gamma
Other Names	GPE1BP, IG/EBP-1
Accession No.	Swissprot:P53567Gene Accession:BC007582
Uniprot	P53567
GeneID	1054;
Storage	-20~-80°C, pH 7.6 PBS

Background

The C/EBP family of transcription factors regulates viral and cellular CCAAT/enhancer element-mediated transcription. C/EBP proteins contain the bZIP region, which is characterized by two motifs in the C-terminal half of the protein: a basic region involved in DNA binding and a leucine zipper motif involved in dimerization. The C/EBP family consist of several related proteins, C/EBP alpha, C/EBP beta, C/EBP gamma, and C/EBP delta, that form homodimers and that form heterodimers with each other. CCAAT/enhancer binding protein gamma may cooperate with Fos to bind PRE-I enhancer elements. Two transcript variants encoding the same protein have been found for this gene.
