

Recombinant Human CLEC1A

Catalog No: #GP10301

Package Size: #GP10301-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CLEC1A
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 144-258 amino acids of human C-type lectin domain family 1, member A
Target Name	C-type lectin domain family 1, member A
Other Names	CLEC1
Accession No.	Swissprot:Q8NC01Gene Accession:BC039072
Uniprot	Q8NC01
GenID	51267;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD) superfamily. Members of this family share a common protein fold and have diverse functions, such as cell adhesion, cell-cell signalling, glycoprotein turnover, and roles in inflammation and immune response. The encoded protein may play a role in regulating dendritic cell function. Alternative splice variants have been described but their biological nature has not been determined. This gene is closely linked to other CTL/CTLD superfamily members on chromosome 12p13 in the natural killer gene complex region.
