

Recombinant Human CLEC4A

Catalog No: #GP10350

Package Size: #GP10350-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CLEC4A
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 70-237 amino acids of human C-type lectin domain family 4, member A
Target Name	C-type lectin domain family 4, member A
Other Names	DCIR, LLIR, DDB27, CLECSF6, HDCGC13P
Accession No.	Swissprot:Q9UMR7Gene Accession:BC117439
Uniprot	Q9UMR7
GenID	50856;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD) superfamily. Members of this family share a common protein fold and have diverse functions, such as cell adhesion, cell-cell signalling, glycoprotein turnover, and roles in inflammation and immune response. The encoded type 2 transmembrane protein may play a role in inflammatory and immune response. Multiple transcript variants encoding distinct isoforms have been identified for this gene. This gene is closely linked to other CTL/CTLD superfamily members on chromosome 12p13 in the natural killer gene complex region.
