

Recombinant Human DOK4

Catalog No: #GP10371

Package Size: #GP10371-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human DOK4
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	docking protein 4
Other Names	IRS5; IRS-5
Accession No.	Swissprot:Q8TEW6Gene Accession:BC001540
Uniprot	Q8TEW6
GeneID	55715;
Storage	-20~-80°C, pH 7.6 PBS

Background

DOK proteins are enzymatically inert adaptor or scaffolding proteins. They provide a docking platform for the assembly of multimolecular signaling complexes. DOK4 functions in RET-mediated neurite outgrowth and plays a positive role in activation of the MAP kinase pathway (By similarity). Putative link with downstream effectors of RET in neuronal differentiation. May be involved in the regulation of the immune response induced by T-cells.
