Recombinant Human RDX

Catalog No: #GP10407

Package Size: #GP10407-1 100ug

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Description

Product Name	Recombinant Human RDX
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to N terminal 300 amino acids of human radixin
Target Name	radixin
Other Names	DFNB24
Accession No.	Swissprot:P35241Gene Accession:BC047109
Uniprot	P35241
GeneID	5962;
Storage	-20~-80°C, pH 7.6 PBS

Background

Radixin is a cytoskeletal protein that may be important in linking actin to the plasma membrane. It is highly similar in sequence to both ezrin and moesin. The radixin gene has been localized by fluorescence in situ hybridization to 11q23. A truncated version representing a pseudogene (RDXP2) was assigned to Xp21.3. Another pseudogene that seemed to lack introns (RDXP1) was mapped to 11p by Southern and PCR analyses. Multiple alternatively spliced transcript variants encoding different isoforms have been found for this gene.
