

Recombinant Human FANCF

Catalog No: #GP10412

Package Size: #GP10412-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human FANCF
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	Fanconi anemia, complementation group F
Other Names	FAF
Accession No.	Swissprot:Q9NPI8Gene Accession:BC063038
Uniprot	Q9NPI8
GeneID	2188;
Storage	-20~-80°C, pH 7.6 PBS

Background

The Fanconi anemia complementation group (FANC) currently includes FANCA, FANCB, FANCC, FANCD1 (also called BRCA2), FANCD2, FANCE, FANCF, FANCG, FANCI, FANCI (also called BRIP1), FANCL, FANCM and FANCN (also called PALB2). The previously defined group FANCH is the same as FANCA. Fanconi anemia is a genetically heterogeneous recessive disorder characterized by cytogenetic instability, hypersensitivity to DNA crosslinking agents, increased chromosomal breakage, and defective DNA repair. The members of the Fanconi anemia complementation group do not share sequence similarity; they are related by their assembly into a common nuclear protein complex. This gene encodes the protein for complementation group F.
