

Recombinant Human GNB1

Catalog No: #GP10428

Package Size: #GP10428-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human GNB1
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	guanine nucleotide binding protein (G protein), beta polypeptide 1
Accession No.	Swissprot:P62873Gene Accession:BC004186
Uniprot	P62873
GeneID	2782;
Storage	-20~-80°C, pH 7.6 PBS

Background

Heterotrimeric guanine nucleotide-binding proteins (G proteins), which integrate signals between receptors and effector proteins, are composed of an alpha, a beta, and a gamma subunit. These subunits are encoded by families of related genes. This gene encodes a beta subunit. Beta subunits are important regulators of alpha subunits, as well as of certain signal transduction receptors and effectors. This gene uses alternative polyadenylation signals.
