

Recombinant Human HCK

Catalog No: #GP10465

Package Size: #GP10465-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human HCK
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 265-515 amino acids of human hemopoietic cell kinase
Target Name	HCK proto-oncogene, Src family tyrosine kinase
Other Names	JTK9; p59Hck; p61Hck
Accession No.	Swissprot:P08631Gene Accession:BC014435
Uniprot	P08631
GeneID	3055;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene is a member of the Src family of tyrosine kinases. This protein is primarily hemopoietic, particularly in cells of the myeloid and B-lymphoid lineages. It may help couple the Fc receptor to the activation of the respiratory burst. In addition, it may play a role in neutrophil migration and in the degranulation of neutrophils. Multiple isoforms with different subcellular distributions are produced due to both alternative splicing and the use of alternative translation initiation codons, including a non-AUG (CUG) codon.?
