

Recombinant Human HOXC10

Catalog No: #GP10483

Package Size: #GP10483-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human HOXC10
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 300 amino acids of human homeobox C10
Target Name	homeobox C10
Other Names	HOX3I
Accession No.	Swissprot:Q9NYD6Gene Accession:BC001293
Uniprot	Q9NYD6
GeneID	3226;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene belongs to the homeobox family of genes. The homeobox genes encode a highly conserved family of transcription factors that play an important role in morphogenesis in all multicellular organisms. Mammals possess four similar homeobox gene clusters, HOXA, HOXB, HOXC and HOXD, which are located on different chromosomes and consist of 9 to 11 genes arranged in tandem. This gene is one of several homeobox HOXC genes located in a cluster on chromosome 12. The protein level is controlled during cell differentiation and proliferation, which may indicate this protein has a role in origin activation.
