

Recombinant Human IGF2BP3

Catalog No: #GP10504

Package Size: #GP10504-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human IGF2BP3
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 382-579 amino acids of human IGF2BP3
Target Name	insulin-like growth factor 2 mRNA binding protein 3
Other Names	KOC; CT98; IMP3; KOC1; IMP-3; VICKZ3
Accession No.	Swissprot:O00425Gene Accession:BC065269
Uniprot	O00425
GeneID	10643;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene is primarily found in the nucleolus, where it can bind to the 5' UTR of the insulin-like growth factor II leader 3 mRNA and may repress translation of insulin-like growth factor II during late development. The encoded protein contains several KH domains, which are important in RNA binding and are known to be involved in RNA synthesis and metabolism. A pseudogene exists on chromosome 7, and there are putative pseudogenes on other chromosomes.
