

Recombinant Human IGSF8

Catalog No: #GP10505

Package Size: #GP10505-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human IGSF8
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 242-475 amino acids of human immunoglobulin superfamily, member 8
Target Name	immunoglobulin superfamily, member 8
Other Names	EWI2; PGRL; CD316; EWI-2; KCT-4; CD81P3; LIR-D1
Accession No.	Swissprot:Q969P0Gene Accession:BC053881
Uniprot	Q969P0
GenID	93185;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member the EWI subfamily of the immunoglobulin protein superfamily. Members of this family contain a single transmembrane domain, an EWI (Glu-Trp-Ile)-motif and a variable number of immunoglobulin domains. This protein interacts with the tetraspanins CD81 and CD9 and may regulate their role in certain cellular functions including cell migration and viral infection. The encoded protein may also function as a tumor suppressor by inhibiting the proliferation of certain cancers. Alternate splicing results in multiple transcript variants that encode the same protein.
