Recombinant Human KLK15

Catalog No: #GP10552

Package Size: #GP10552-1 100ug

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Description

Product Name	Recombinant Human KLK15
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 22-256 amino acids of human kallikrein-related peptidase 15
	population is
Target Name	kallikrein-related peptidase 15
Other Names	ACO, HSRNASPH
Accession No.	Swissprot:Q9H2R5Gene Accession:BC126137
Uniprot	Q9H2R5
GeneID	55554;
Storage	-20~-80°C, pH 7.6 PBS

Background

Kallikreins are a subgroup of serine proteases having diverse physiological functions. Growing evidence suggests that many kallikreins are implicated in carcinogenesis and some have potential as novel cancer and other disease biomarkers. This gene is one of the fifteen kallikrein subfamily members located in a cluster on chromosome 19. In prostate cancer, this gene has increased expression, which indicates its possible use as a diagnostic or prognostic marker for prostate cancer. The gene contains multiple polyadenylation sites and alternative splicing results in multiple transcript variants encoding distinct isoforms.
