

Recombinant Human MAGEB4

Catalog No: #GP10574

Package Size: #GP10574-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human MAGEB4
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein(346AA,FULL)
Target Name	melanoma antigen family B, 4
Other Names	CT3.6
Accession No.	Swissprot:O15481Gene Accession:BC032852
Uniprot	O15481
GeneID	4115;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene is a member of the MAGEB gene family. The members of this family have their entire coding sequences located in the last exon, and the encoded proteins show 50 to 68 sequence identity to each other. The promoters and first exons of the MAGEB genes show considerable variability, suggesting that the existence of this gene family enables the same function to be expressed under different transcriptional controls. The MAGEB genes are clustered on chromosome Xp22-p21. This gene sequence ends in the first intron of MAGEB1, another family member. This gene is expressed in testis.?
