

Recombinant Human MAGED1

Catalog No: #GP10575

Package Size: #GP10575-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human MAGED1
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 300 amino acids of human melanoma antigen family D, 1
Target Name	melanoma antigen family D, 1
Other Names	NRAGE, DLXIN-1
Accession No.	Swissprot:Q9Y5V3Gene Accession:BC032473
Uniprot	Q9Y5V3
GeneID	9500;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene is a member of the melanoma antigen gene (MAGE) family. Most of the genes of this family encode tumor specific antigens that are not expressed in normal adult tissues except testis. Although the protein encoded by this gene shares strong homology with members of the MAGE family, it is expressed in almost all normal adult tissues. This gene has been demonstrated to be involved in the p75 neurotrophin receptor mediated programmed cell death pathway. Three transcript variants encoding two different isoforms have been found for this gene.
