

# Recombinant Human MSN

Catalog No: #GP10603

Package Size: #GP10603-1 100ug

Orders: [order@signalwayantibody.com](mailto:order@signalwayantibody.com)Support: [tech@signalwayantibody.com](mailto:tech@signalwayantibody.com)

## Description

Product Name	Recombinant Human MSN
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to N terminal 300 amino acids of human moesin
Target Name	moesin
Other Names	HEL70
Accession No.	Swissprot:P26038Gene Accession:BC017293
Uniprot	P26038
GeneID	4478;
Storage	-20~-80°C, pH 7.6 PBS

## Background

Moesin (for membrane-organizing extension spike protein) is a member of the ERM family which includes ezrin and radixin. ERM proteins appear to function as cross-linkers between plasma membranes and actin-based cytoskeletons. Moesin is localized to filopodia and other membranous protrusions that are important for cell-cell recognition and signaling and for cell movement. Probably involved in connections of major cytoskeletal structures to the plasma membrane. May inhibit herpes simplex virus 1 infection at an early stage.
