

Recombinant Human MSLN

Catalog No: #GP10610

Package Size: #GP10610-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human MSLN
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 296-606 amino acids of human mesothelin
Target Name	mesothelin
Other Names	MPF; SMRP
Accession No.	Swissprot:Q13421Gene Accession:BC009272
Uniprot	Q13421
GeneID	10232;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a precursor protein that is cleaved into two products, megakaryocyte potentiating factor and mesothelin. Megakaryocyte potentiation factor functions as a cytokine that can stimulate colony formation in bone marrow megakaryocytes. Mesothelin is a glycosylphosphatidylinositol-anchored cell-surface protein that may function as a cell adhesion protein. This protein is overexpressed in epithelial mesotheliomas, ovarian cancers and in specific squamous cell carcinomas. Alternative splicing results in multiple transcript variants.
