

Recombinant Human TP73

Catalog No: #GP10669

Package Size: #GP10669-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human TP73
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 131-310 amino acids of human tumor protein p73
Target Name	tumor protein p73
Other Names	P73
Accession No.	Swissprot:O15350Gene Accession:BC117251
Uniprot	O15350
GeneID	7161;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member of the p53 family of transcription factors involved in cellular responses to stress and development. It maps to a region on chromosome 1p36 that is frequently deleted in neuroblastoma and other tumors, and thought to contain multiple tumor suppressor genes. The demonstration that this gene is monoallelically expressed (likely from the maternal allele), supports the notion that it is a candidate gene for neuroblastoma. Many transcript variants resulting from alternative splicing and/or use of alternate promoters have been found for this gene, but the biological validity and the full-length nature of some variants have not been determined.
