

Recombinant Human PAK2

Catalog No: #GP10675

Package Size: #GP10675-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human PAK2
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 249-499 amino acids of human p21 protein (Cdc42/Rac)-activated kinase 2
Target Name	p21 protein (Cdc42/Rac)-activated kinase 2
Other Names	PAK65; PAKgamma
Accession No.	Swissprot:Q13177Gene Accession:BC069613
Uniprot	Q13177
GenID	5062;
Storage	-20~-80°C, pH 7.6 PBS

Background

The p21 activated kinases (PAK) are critical effectors that link Rho GTPases to cytoskeleton reorganization and nuclear signaling. The PAK proteins are a family of serine/threonine kinases that serve as targets for the small GTP binding proteins, CDC42 and RAC1, and have been implicated in a wide range of biological activities. The protein encoded by this gene is activated by proteolytic cleavage during caspase-mediated apoptosis, and may play a role in regulating the apoptotic events in the dying cell.?
