

Recombinant Human TRAF3IP2

Catalog No: #GP10848

Package Size: #GP10848-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human TRAF3IP2
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 1-256 amino acids of human TRAF3 interacting protein 2
Target Name	TRAF3 interacting protein 2
Other Names	ACT1; CIKS; C6orf2; C6orf4; C6orf5; C6orf6; PSORS13
Accession No.	Swissprot:O43734Gene Accession:BC002823
Uniprot	O43734
GenID	10758;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a protein involved in regulating responses to cytokines by members of the Rel/NF-kappaB transcription factor family. These factors play a central role in innate immunity in response to pathogens, inflammatory signals and stress. This gene product interacts with TRAF proteins (tumor necrosis factor receptor-associated factors) and either I-kappaB kinase or MAP kinase to activate either NF-kappaB or Jun kinase. Several alternative transcripts encoding different isoforms have been identified. Another transcript, which does not encode a protein and is transcribed in the opposite orientation, has been identified. Overexpression of this transcript has been shown to reduce expression of at least one of the protein encoding transcripts, suggesting it has a regulatory role in the expression of this gene.
