

Recombinant Human WNT9A

Catalog No: #GP10878

Package Size: #GP10878-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human WNT9A
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 93-365 amino acids of human WNT9A
Target Name	Wnt family member 9A
Other Names	WNT14
Accession No.	Swissprot:O14904Gene Accession:BC113431
Uniprot	O14904
GeneID	7483;
Storage	-20~-80°C, pH 7.6 PBS

Background

The WNT gene family consists of structurally related genes that encode secreted signaling proteins. These proteins have been implicated in oncogenesis and in several developmental processes, including regulation of cell fate and patterning during embryogenesis. This gene is a member of the WNT gene family. It is expressed in gastric cancer cell lines. The protein encoded by this gene shows 75% amino acid identity to chicken Wnt14, which has been shown to play a central role in initiating synovial joint formation in the chick limb. This gene is clustered with another family member, WNT3A, in the chromosome 1q42 region.
