

Recombinant Human ABCF1

Catalog No: #GP10910

Package Size: #GP10910-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human ABCF1
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 625-840 amino acids of human ATP-binding cassette, sub-family F (GCN20), member 1
Target Name	ATP-binding cassette, sub-family F (GCN20), member 1
Other Names	ABC27; ABC50
Accession No.	Swissprot:Q8NE71Gene Accession:BC034488
Uniprot	Q8NE71
GenID	23;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the GCN20 subfamily. Unlike other members of the superfamily, this protein lacks the transmembrane domains which are characteristic of most ABC transporters. This protein may be regulated by tumor necrosis factor-alpha and play a role in enhancement of protein synthesis and the inflammation process.
