## **SPACA3** Antibody

Catalog No: #42941

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Description	Support: tech@signalwaya	antibody.com
Product Name	SPACA3 Antibody	
Host Species	Rabbit	
Clonality	Polyclonal	
Purification	Antigen affinity purification.	
Applications	IHC	
Species Reactivity	Hu	
Specificity	The antibody detects endogenous levels of total SPACA3 protein.	
Immunogen Type	protein	
Immunogen Description	Full length fusion protein of human SPACA3	

Other Names	CT54; LYC3; LYZL3; SLLP1; ALLP17; 1700025M08Rik	

SPACA3

Accession No. Swiss-Prot#: Q8IXA5Gene ID: 124912
Uniprot Q8IXA5

GeneID 124912;
Concentration 2.4mg/ml

Formulation Rabbit IgG in pH7.4 PBS, 0.05% NaN3, 40% Glycerol.

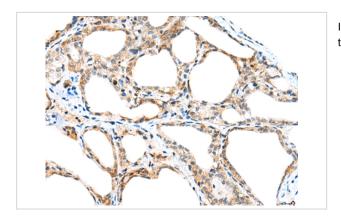

Storage Store at -20°C

## **Application Details**

**Target Name** 

Immunohistochemistry: 1:25-1:100

## **Images**

Immunohistochemical analysis of paraffin-embedded Human thyroid cancer tissue using #42941 at dilution 1/45,

## Background

SPACA3 (sperm acrosome associated 3), also known as sperm lysozyme-like protein 1, lysozyme-like protein 3, lysozyme-like acrosomal sperm-specific secretory protein ALLP-17, cancer/testis antigen 54 (CT54), LYC3, SPRASA or LYZL3, is a 215 amino acid protein that participates in the fusion and adhesion of sperm and egg plasma membrane during fertilization. Identified as a novel cancer/testis antigen in hematologic malignancies, SPACA3 has the ability to elicit B-cell immune responses in patients with cancer and is considered a potential target for immunotherapy.

A member of the glycosyl hydrolase 22 family which is expressed in testis, placenta and epididymis, SPACA3 exists as two alternatively spliced isoforms; SPACA3 isoform 1 is a single-pass type II membrane protein of the sperm acrosome whereas SPACA3 isoform 2 is a secreted protein. Sperm surface membrane protein that may be involved in sperm-egg plasma membrane adhesion and fusion during fertilization. It could be a potential receptor for the egg oligosaccharide residue N-acetylglucosamine, which is present in the extracellular matrix over the egg plasma membrane. The processed form has no detectable bacteriolytic activity in vitro.

Note: This product is for in vitro research use only
