

Recombinant Human APPBP2

Catalog No: #GP11065

Package Size: #GP11065-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human APPBP2
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 322-585 amino acids of human amyloid beta precursor protein (cytoplasmic tail) binding protein 2
Target Name	amyloid beta precursor protein (cytoplasmic tail) binding protein 2
Other Names	PAT1; APP-BP2; HS.84084
Accession No.	Swissprot:Q92624Gene Accession:BC018121
Uniprot	Q92624
GenID	10513;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene interacts with microtubules and is functionally associated with beta-amyloid precursor protein transport and/or processing. The beta-amyloid precursor protein is a cell surface protein with signal-transducing properties, and it is thought to play a role in the pathogenesis of Alzheimer's disease. The encoded protein may be involved in regulating cell death. This gene has been found to be highly expressed in breast cancer. Alternative splicing results in multiple transcript variants.
