

Recombinant Human NAPSA

Catalog No: #GP11067

Package Size: #GP11067-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human NAPSA
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 250 amino acids of human napsin A aspartic peptidase
Target Name	napsin A aspartic peptidase
Other Names	KAP; Kdap; NAP1; NAPA; SNAPA
Accession No.	Swissprot:O96009Gene Accession:BC017842
Uniprot	O96009
GeneID	9476;
Storage	-20~-80°C, pH 7.6 PBS

Background

The activation peptides of aspartic proteinases plays role as inhibitors of the active site. These peptide segments, or pro-parts, are deemed important for correct folding, targeting, and control of the activation of aspartic proteinase zymogens. The pronapsin A gene is expressed predominantly in lung and kidney. Its translation product is predicted to be a fully functional, glycosylated aspartic proteinase precursor containing an RGD motif and an additional 18 residues at its C-terminus.
