

Recombinant Human WNT11

Catalog No: #GP11086

Package Size: #GP11086-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human WNT11
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 26-285 amino acids of human wingless-type MMTV integration site family, member 11
Target Name	wingless-type MMTV integration site family, member 11
Other Names	HWNT11
Accession No.	Swissprot:O96014Gene Accession:BC113386
Uniprot	O96014
GenID	7481;
Storage	-20~-80°C, pH 7.6 PBS

Background

The WNT gene family consists of structurally related genes which encode secreted signaling proteins. These proteins have been implicated in oncogenesis and in several developmental processes, including regulation of cell fate and patterning during embryogenesis. This gene is a member of the WNT gene family. It encodes a protein which shows 97%, 85%, and 63% amino acid identity with mouse, chicken, and *Xenopus* Wnt11 protein, respectively. This gene may play roles in the development of skeleton, kidney and lung, and is considered to be a plausible candidate gene for High Bone Mass Syndrome
