

Recombinant Human STAM

Catalog No: #GP11132

Package Size: #GP11132-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human STAM
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 300 amino acids of human signal transducing adaptor molecule (SH3 domain and ITAM motif) 1
Target Name	signal transducing adaptor molecule (SH3 domain and ITAM motif) 1
Other Names	STAM1; STAM-1
Accession No.	Swissprot:Q92783Gene Accession:BC030586
Uniprot	Q92783
GenID	8027;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member of the signal-transducing adaptor molecule family. These proteins mediate downstream signaling of cytokine receptors and also play a role in ER to Golgi trafficking by interacting with the coat protein II complex. The encoded protein also associates with hepatocyte growth factor-regulated substrate to form the endosomal sorting complex required for transport-0 (ESCRT-0), which sorts ubiquitinated membrane proteins to the ESCRT-1 complex for lysosomal degradation. Alternatively spliced transcript variants have been observed for this gene.
