

Recombinant Human PRKCE

Catalog No: #GP11152

Package Size: #GP11152-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human PRKCE
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to N terminal 250 amino acids of human protein kinase C, epsilon
Target Name	protein kinase C, epsilon
Other Names	PKCE; nPKC-epsilon
Accession No.	Swissprot:Q02156Gene Accession:BC109033
Uniprot	Q02156
GeneID	5581;
Storage	-20~-80°C, pH 7.6 PBS

Background

Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members.?
