

Recombinant Human MAP4K2

Catalog No: #GP11156

Package Size: #GP11156-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human MAP4K2
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 250 amino acids of human mitogen-activated protein kinase kinase kinase kinase 2
Target Name	mitogen-activated protein kinase kinase kinase kinase 2
Other Names	GCK; BL44; RAB8IP
Accession No.	Swissprot:Q12851Gene Accession:BC047865
Uniprot	Q12851
GenID	5871;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene is a member of the serine/threonine protein kinase family. Although this kinase is found in many tissues, its expression in lymphoid follicles is restricted to the cells of germinal centre, where it may participate in B-cell differentiation. This kinase can be activated by TNF-alpha, and has been shown to specifically activate MAP kinases. This kinase is also found to interact with TNF receptor-associated factor 2 (TRAF2), which is involved in the activation of MAP3K1/MEKK1.?
