

Recombinant Human HIPK4

Catalog No: #GP11158

Package Size: #GP11158-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human HIPK4
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to N terminal 300 amino acids of human homeodomain interacting protein kinase 4
Target Name	homeodomain interacting protein kinase 4
Accession No.	Swissprot:Q8NE63Gene Accession:BC034501
Uniprot	Q8NE63
GeneID	147746;
Storage	-20~-80°C, pH 7.6 PBS

Background

HIPK4 (Homeodomain-interacting protein kinase 4) is a 616 amino acid protein that localizes to the cytoplasm and exists as two isoforms that are produced by alternative splicing events. Like other members of the HIPK family, HIPK4 functions as a protein kinase that catalyzes the ATP-dependent phosphorylation of target proteins and is thought to act as a corepressor of target transcription factors.
