

Recombinant Human ATG9A

Catalog No: #GP11207

Package Size: #GP11207-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human ATG9A
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 300-590 amino acids of human autophagy related 9A
Target Name	autophagy related 9A
Other Names	mATG9; APG9L1; MGD3208
Accession No.	Swissprot:Q7Z3C6Gene Accession:BC001206
Uniprot	Q7Z3C6
GeneID	79065;
Storage	-20~-80°C, pH 7.6 PBS

Background

Autophagy-related protein 9A is a protein that in humans is encoded by the ATG9A gene. Involved in autophagy and cytoplasm to vacuole transport (Cvt) vesicle formation. Plays a key role in the organization of the preautophagosomal structure/phagophore assembly site (PAS), the nucleating site for formation of the sequestering vesicle. Cycles between a juxta-nuclear trans-Golgi network compartment and late endosomes. Nutrient starvation induces accumulation on autophagosomes.
