

Recombinant Human SLAMF8

Catalog No: #GP11285

Package Size: #GP11285-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human SLAMF8
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 23-233 amino acids of human SLAM family member 8p
Target Name	SLAM family member 8p
Other Names	BLAME; CD353; SBBI42
Accession No.	Swissprot:Q9P0V8Gene Accession:BC109194
Uniprot	Q9P0V8
GeneID	56833;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member of the CD2 family of cell surface proteins involved in lymphocyte activation. These proteins are characterized by Ig domains. This protein is expressed in lymphoid tissues, and studies of a similar protein in mouse suggest that it may function during B cell lineage commitment. The gene is found in a region of chromosome 1 containing many CD2 genes.
