

Recombinant Human CAB39L

Catalog No: #GP11300

Package Size: #GP11300-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CAB39L
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 300 amino acids of human calcium binding protein 39-like
Target Name	calcium binding protein 39-like
Other Names	MO2L; MO25-BETA; bA103J18.3; RP11-103J18.3
Accession No.	Swissprot:Q9H9S4Gene Accession:BC010993
Uniprot	Q9H9S4
GeneID	81617;
Storage	-20~-80°C, pH 7.6 PBS

Background

Calcium-binding protein 39-like is a protein that in humans is encoded by the CAB39L gene. CAB39L (calcium binding protein 39-like), also known as MO25L (MO25-like) or MO2L, is a 337 amino acid protein that is similar to MO25 and is found in the serum of nearly half of all patients diagnosed with acute monocytic leukemia. This suggests a role for CAB39L in carcinogenesis.
