

Recombinant Human CD200R1

Catalog No: #GP11341

Package Size: #GP11341-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CD200R1
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 29-203 amino acids of human CD200 receptor 1
Target Name	CD200 receptor 1
Other Names	OX2R; MOX2R; CD200R; HCRTR2
Accession No.	Swissprot:Q8TD46Gene Accession:BC069661
Uniprot	Q8TD46
GeneID	131450;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a receptor for the OX-2 membrane glycoprotein. Both the receptor and substrate are cell surface glycoproteins containing two immunoglobulin-like domains. This receptor is restricted to the surfaces of myeloid lineage cells and the receptor-substrate interaction may function as a myeloid downregulatory signal. Mouse studies of a related gene suggest that this interaction may control myeloid function in a tissue-specific manner. Alternative splicing of this gene results in multiple transcript variants.
