

Recombinant Human EIF3F

Catalog No: #GP11495

Package Size: #GP11495-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human EIF3F
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from C terminal 250 amino acids of human eukaryotic translation initiation factor 3, subunit F
Target Name	eukaryotic translation initiation factor 3, subunit F
Other Names	EIF3S5; eIF3-p47
Accession No.	Swissprot:O00303Gene Accession:BC000490
Uniprot	O00303
GenID	8665;
Storage	-20~-80°C, pH 7.6 PBS

Background

Eukaryotic translation initiation factor 3 subunit F is a protein that in humans is encoded by the EIF3F gene. The eIF-3 complex stimulates mRNA recruitment to the 43S PIC and scanning of the mRNA for AUG recognition. The eIF-3 complex is also required for disassembly and recycling of post-termination ribosomal complexes and subsequently prevents premature joining of the 40S and 60S ribosomal subunits prior to initiation.
