

Recombinant Human FASTKD5

Catalog No: #GP11542

Package Size: #GP11542-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human FASTKD5
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 530-715 amino acids of human FAST kinase domains 5
Target Name	FAST kinase domains 5
Other Names	dJ1187M17.5
Accession No.	Swissprot:Q7L8L6Gene Accession:NP_068598
Uniprot	Q7L8L6
GeneID	60493;
Storage	-20~-80°C, pH 7.6 PBS

Background

Representing about 2% of human DNA, chromosome 20 consists of approximately 63 million bases and 600 genes. Chromosome 20 contains a region with numerous genes expressed in the epididymis which are thought important for seminal production and some viewed as potential targets for male contraception. The PRNP gene encoding the prion protein associated with spongiform encephalopathies, like Creutzfeldt-Jakob disease, is found on chromosome 20. Amyotrophic lateral sclerosis, spinal muscular atrophy, ring chromosome 20 epilepsy syndrome and Alagille syndrome are also associated with chromosome 20.
