

Recombinant Human IHH

Catalog No: #GP11660

Package Size: #GP11660-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human IHH
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 203-411 amino acids of human indian hedgehog
Target Name	indian hedgehog
Other Names	BDA1; HHG2
Accession No.	Swissprot:Q14623Gene Accession:BC034757
Uniprot	Q14623
GeneID	3549;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member of the hedgehog family of secreted signaling molecules. Hedgehog proteins are essential regulators of a variety of developmental processes including growth, patterning and morphogenesis. The encoded protein specifically plays a role in bone growth and differentiation. Mutations in this gene are the cause of brachydactyly type A1 which is characterized by shortening or malformation of the phalanges. Mutations in this gene are also the cause of acrocapitofemoral dysplasia.
