

Recombinant Human IL27RA

Catalog No: #GP11666

Package Size: #GP11666-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human IL27RA
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 319-507 amino acids of human interleukin 27 receptor, alpha
Target Name	interleukin 27 receptor, alpha
Other Names	CRL1; TCCR; WSX1; IL27R; IL-27RA; zcytor1
Accession No.	Swissprot:Q6UWB1Gene Accession:BC028003
Uniprot	Q6UWB1
GenID	9466;
Storage	-20~-80°C, pH 7.6 PBS

Background

In mice, CD4+ helper T-cells differentiate into type 1 (Th1) cells, which are critical for cell-mediated immunity, predominantly under the influence of IL12. Also, IL4 influences their differentiation into type 2 (Th2) cells, which are critical for most antibody responses. Mice deficient in these cytokines, their receptors, or associated transcription factors have impaired, but are not absent of, Th1 or Th2 immune responses. This gene encodes a protein which is similar to the mouse T-cell cytokine receptor Tccr at the amino acid level, and is predicted to be a glycosylated transmembrane protein.
