

Recombinant Human MAGEA8

Catalog No: #GP11730

Package Size: #GP11730-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human MAGEA8
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	melanoma antigen family A, 8
Other Names	CT1.8; MAGE8
Accession No.	Swissprot:P43361Gene Accession:BC002455
Uniprot	P43361
GeneID	4107;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene is a member of the MAGEA gene family. The members of this family encode proteins with 50 to 80% sequence identity to each other. The promoters and first exons of the MAGEA genes show considerable variability, suggesting that the existence of this gene family enables the same function to be expressed under different transcriptional controls. The MAGEA genes are clustered at chromosomal location Xq28. They have been implicated in some hereditary disorders, such as dyskeratosis congenita. Multiple alternatively spliced variants, encoding the same protein, have been identified.?
