

Recombinant Human NUP62

Catalog No: #GP11822

Package Size: #GP11822-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human NUP62
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 235 amino acids of human nucleoporin 62kDa
Target Name	nucleoporin 62kDa
Other Names	p62; IBSN; SNDI
Accession No.	Swissprot:P37198Gene Accession:BC050717
Uniprot	P37198
GeneID	23636;
Storage	-20~-80°C, pH 7.6 PBS

Background

The nuclear pore complex is a massive structure that extends across the nuclear envelope, forming a gateway that regulates the flow of macromolecules between the nucleus and the cytoplasm. Nucleoporins are the main components of the nuclear pore complex in eukaryotic cells. The protein encoded by this gene is a member of the FG-repeat containing nucleoporins and is localized to the nuclear pore central plug. This protein associates with the importin alpha/beta complex which is involved in the import of proteins containing nuclear localization signals. Multiple transcript variants of this gene encode a single protein isoform.
