

Recombinant Human MSMB

Catalog No: #GP11858

Package Size: #GP11858-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human MSMB
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 21-114 amino acids of human microseminoprotein, beta-
Target Name	microseminoprotein, beta-
Other Names	MSP; PSP; IGBF; MSPB; PN44; PRPS; HPC13; PSP57; PSP94; PSP-94
Accession No.	Swissprot:P08118Gene Accession:BC005257
Uniprot	P08118
GenID	4477;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene is a member of the immunoglobulin binding factor family. It is synthesized by the epithelial cells of the prostate gland and secreted into the seminal plasma. This protein has inhibin-like activity. It may have a role as an autocrine paracrine factor in uterine, breast and other female reproductive tissues. The expression of the encoded protein is found to be decreased in prostate cancer. Two alternatively spliced transcript variants encoding different isoforms are described for this gene.
