

Recombinant Human RNF14

Catalog No: #GP11961

Package Size: #GP11961-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human RNF14
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 11-137 amino acids of human ring finger protein 14
Target Name	ring finger protein 14
Other Names	ARA54; HFB30; TRIAD2; HRIHFB2038
Accession No.	Swissprot:Q9UBS8Gene Accession:BC126185
Uniprot	Q9UBS8
GeneID	9604;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene contains a RING zinc finger, a motif known to be involved in protein-protein interactions. This protein interacts with androgen receptor (AR) and may function as a coactivator that induces AR target gene expression in prostate. A dominant negative mutant of this gene has been demonstrated to inhibit the AR-mediated growth of prostate cancer. This protein also interacts with class III ubiquitin-conjugating enzymes (E2s) and may act as a ubiquitin-ligase (E3) in the ubiquitination of certain nuclear proteins.?
